

**Some specific examples of products that are ineligible for the
Air Transshipment Cargo Exemption Scheme for Specified Strategic Commodities**

The followings are some specific examples of products that are **ineligible** for the Air Transshipment Cargo Exemption Scheme for Specified Strategic Commodities (SCTREX). The list is indicative rather than exhaustive. Products not on the list should not automatically be regarded as being exempted from the licensing requirement under the Scheme. Importers/Exporters should approach the Trade and Industry Department and make use of the Pre-classification Service in case of doubt in the control status of the goods.

This list will be updated where necessary to provide most up-to-date examples for traders' reference. In times of update of the Hong Kong Control List, the examples provided below will be further revised as appropriate to reflect the latest examples of products not ineligible for the SCTREX. The latest released list should supersede the preceding version.
